

Mobix Labs: Defense Communications Hardware Supporting U.S. Navy Ships

March 9, 2026

IRVINE, Calif.--(BUSINESS WIRE)--Mar. 9, 2026-- Mobix Labs, Inc. (Nasdaq: MOBX) announced continued production of communications hardware supporting secure network systems deployed aboard U.S. Navy ships.

The production supports a multi-year defense program with a prime U.S. Navy contractor under the company's previously disclosed orders.

Mobix Labs' technology is designed to protect critical military communications from interference and disruption, helping ensure reliable connectivity for naval operations in demanding maritime environments.

Demand for secure, high-performance communications technology continues to grow across modern military platforms, positioning Mobix Labs to expand its role in defense and high-reliability markets.

This announcement relates to ongoing production supporting previously disclosed defense programs and previously ordered systems. Forward-looking statements are subject to risks and uncertainties described in Mobix Labs' SEC filings.
